CLOUD ATTENDANCE

Hb73

[Forget password](#)

[Registered account](#)

The screenshot shows a web browser window displaying a management dashboard. The browser's address bar shows the URL `66.94.99.149/#/welcome`. The dashboard has a dark sidebar with navigation options: `Cloud attendance`, `personnel manage`, `personnel attendance`, and `System Setting`. The main content area is divided into several sections:

- home**: A sub-section header.
- Personnel record**: A list of personnel activities with dates and names:
 - 2024-05-21
 - Oluwabunmi Zainab BANKOLE departure
 - Oluwakemi Jomiloju FAMUREWA departure
 - Abiodun Ifeoluwa LAWAL Entry
 - 2024-05-15
 - Tolulope Grace THOMAS Entry
 - 2024-05-02
 - Evans ANTHONY Entry
 - Ridwan ABUBAKAR Entry
- This month's statistics**: A section with a calendar icon and a refresh button.
- attendance-statistics diagram**: A section with a date selector set to `2024-08` and a chart showing attendance data. The chart has a vertical axis labeled 'Hours' ranging from 300 to 700.

A white popup window titled **New Function Chat** is overlaid on the right side of the dashboard. It contains the following text:

You can chat with your colleagues and subordinates here, where you can record the work requirements, progress, and problems encountered during negotiations, making it easier for newcomers to take over and continue working. Members can review their work content to reduce work errors and evaluate work performance.

A `Done` button is located at the bottom right of the popup.

EPORDO Cloud Attendance Main Features

01

permission settings

7*24 hours online monitor & Graded management & Flexible interface

02

No need install software

Centralized management Anytime Anywhere

03

Employees chatting function inside software(new)

Real-Time Data transfer from device to software

Free Installation

No need install software,
simple and convenient for
users

**No Location
Limitation**

Without any installation issues
for any Operation System

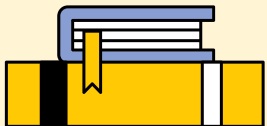

**No Operation
system limitation**

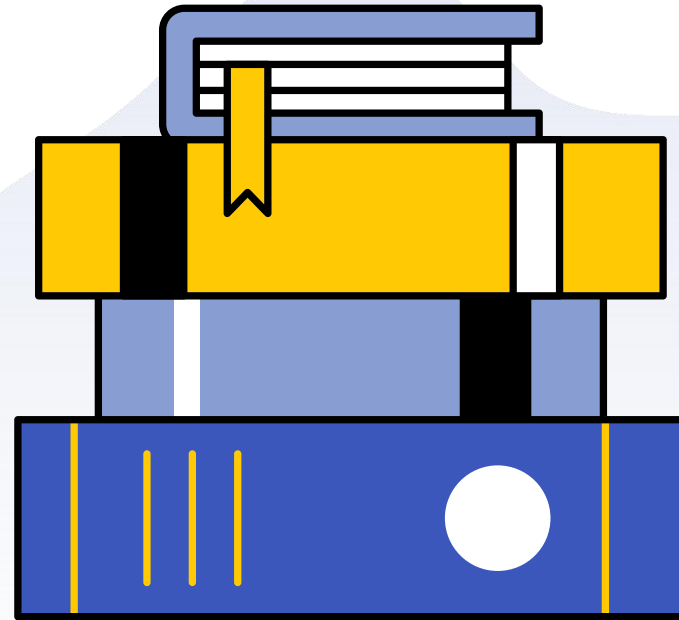

No need professional tech,
EPORDO provide all support

**No need your
own professional
tech**

**Manage all Cloud
machines anytime
anywhere-Centralized
management Globally**

For Employees

01

Mobile approval process

More convenient for employees to ask for leave online

02

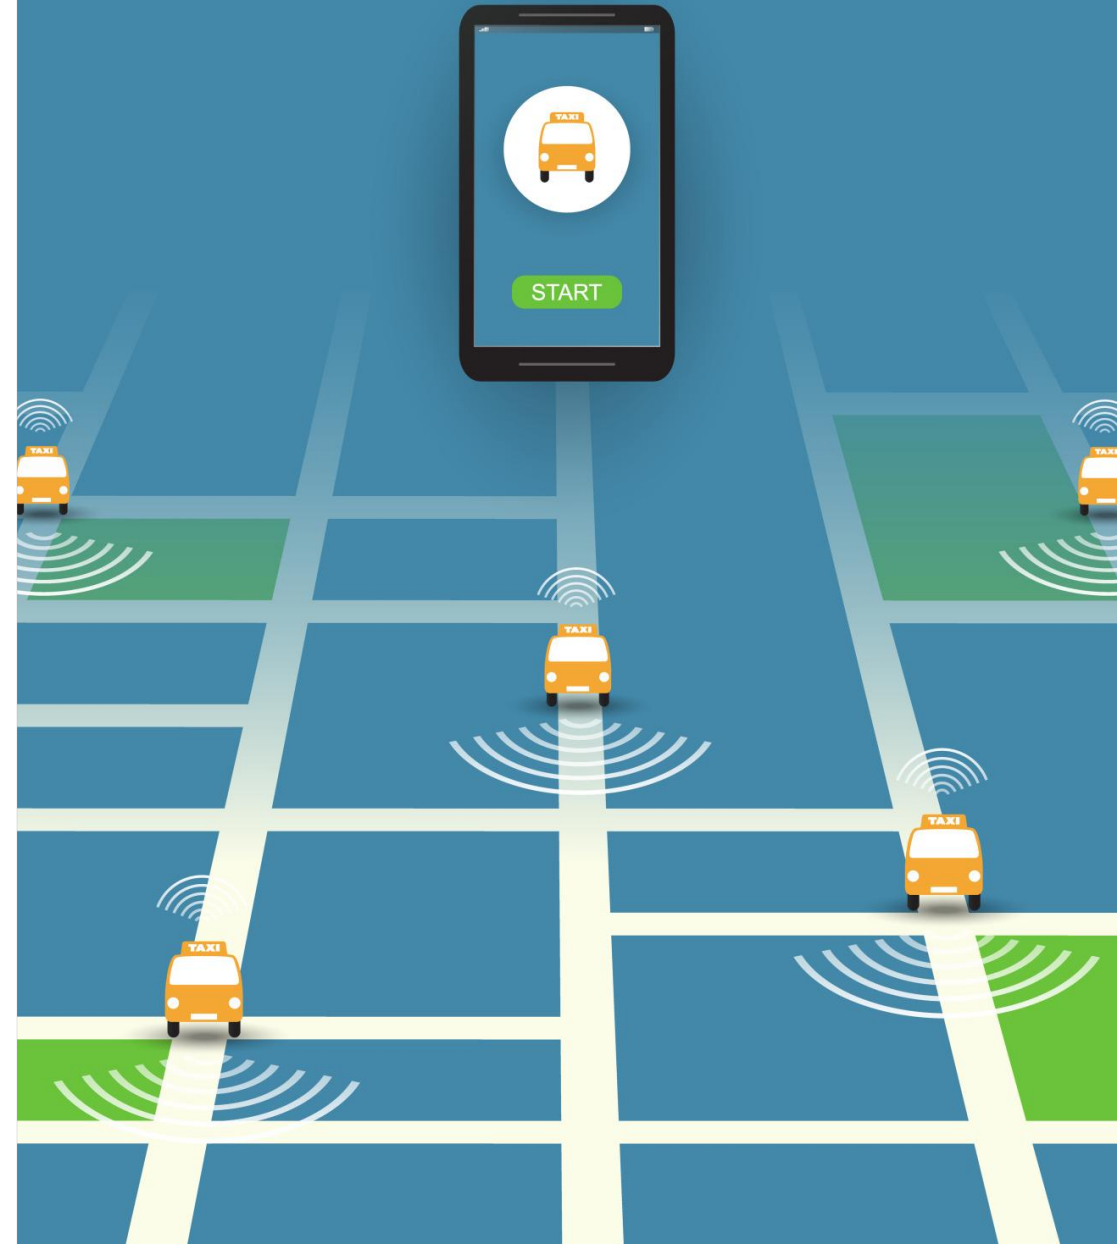

Paperless system

It can Save costs for your company

03

Environmentally and friendly

Every Employee can check their own attendance data/report from PC or Mobile directly! Then no need to print report in paper

For Boss/Manager

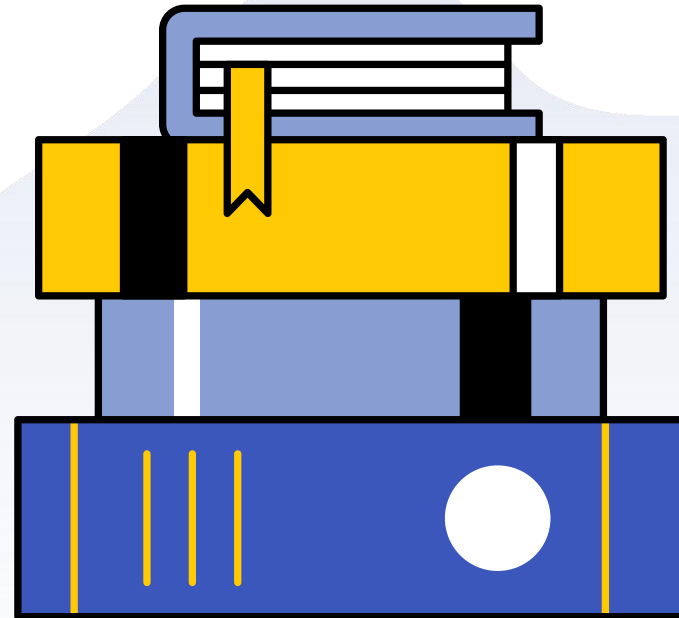

01 To have an impromptu trip-since you have EPORDO management system

02 Information arrival Globally- Intelligent management

03 Select EPORDO , Happy work, Easy work ...

Every boss/Admin can login to check all staffs attendance data from their own PC or Mobile remotely! no locations limitation; any city. any country is ok!

Hardware Requirements and Configuration

Device Networked

Only need to power on device and connect network cable to machine or connect device wifi to your office wifi , no need other settings ; all is set before delivery from EPORDO

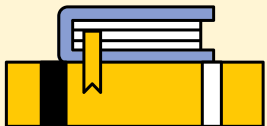

Time Attendance Machine

Choose attendance terminals that support biometric recognition technologies such as fingerprint and facial recognition to ensure the accuracy and security of attendance data.

No Server Requirement

End Users no need server.

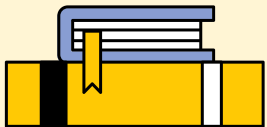

EPORDO Software Free Installation

No Need software Installation

Login our cloud time attendance link directly after you create your own account

Software setting

please check our [paper manual](#) and [video manual](#)-register cloud software -login your cloud software-make basic setting inside software for your company-set department for device-add employee into software , such as name ,enroll ID , mobile, department- set shift - then go to machine to find your name on machine to register face or fingerprint

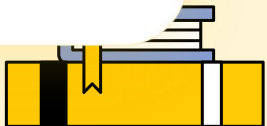

Daily Maintenance

Ensure cloud hardware online and networked

No need other operations, keep device clean, so that it can be used many years ; all attendance data on machine will be sent to cloud software autoly ; when you add new employees to cloud software , input employee name and enroll ID , these datas will be sent to its same department machine autoly , no need to input name and id on machine ! all is real time and autoly !
