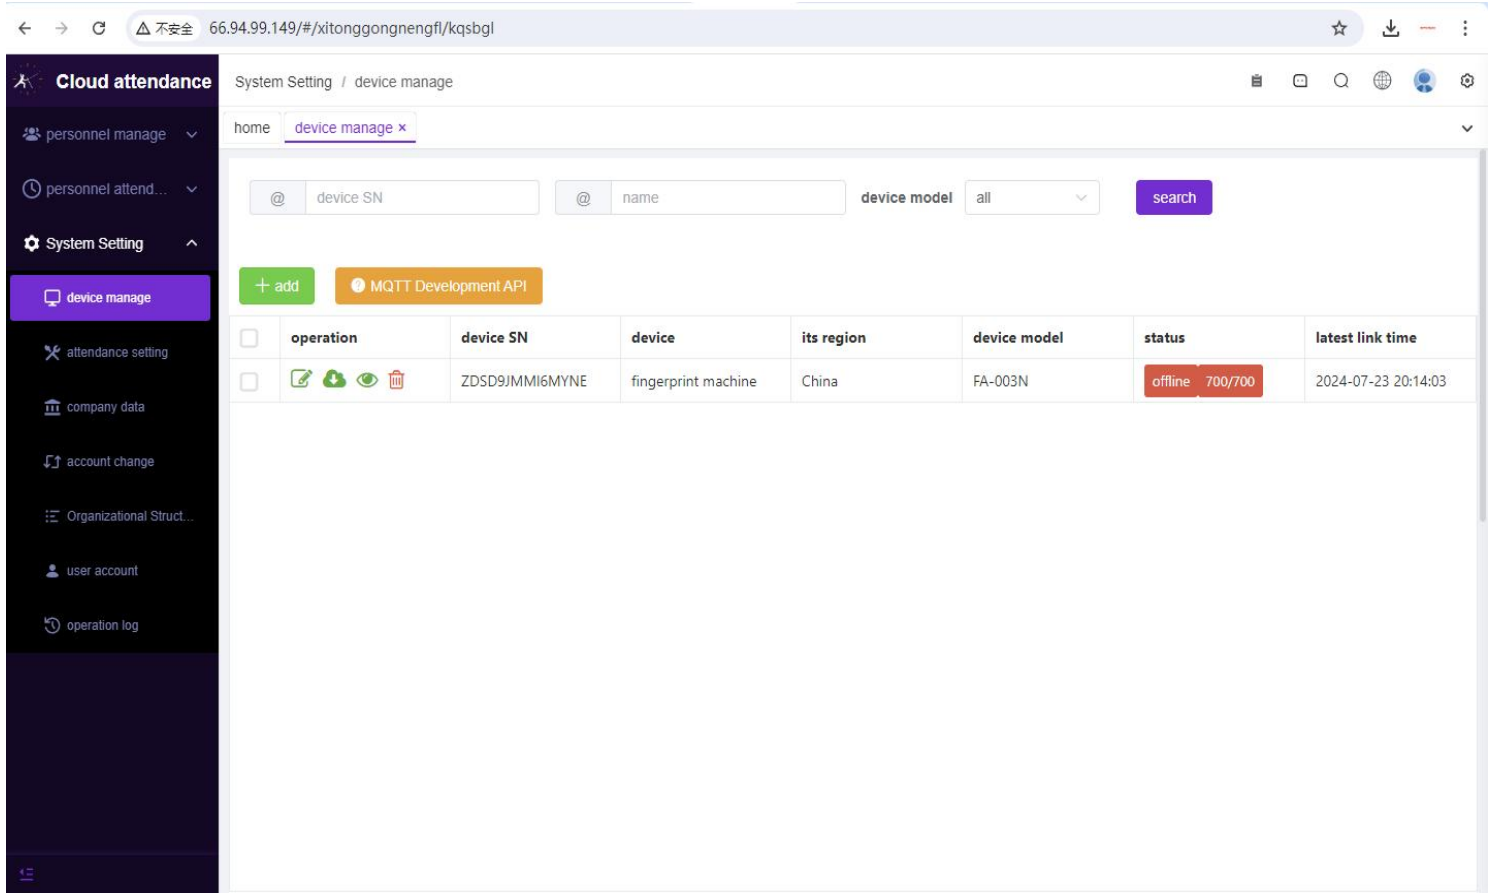
PART 1 ONE

Centralized Management

EPORDO cloud-based online time attendance software that offers **centralized management** with no location or time limitations, allowing management anytime and anywhere, with real-time **machine status monitoring**.it is ideal for **multiple locations** office employees management solutions

Device Manage

Anytime,Anywhere,No location Limitations



Centralized Management

It is Cloud-based time tracking and attendance system with no location restrictions.Offers self-service portal for employees and centralized control for managers. You can Access from any location via the web or mobiles , achieving Real-time tracking, Detailed reporting and centralized data access

EPORDO MQTT API

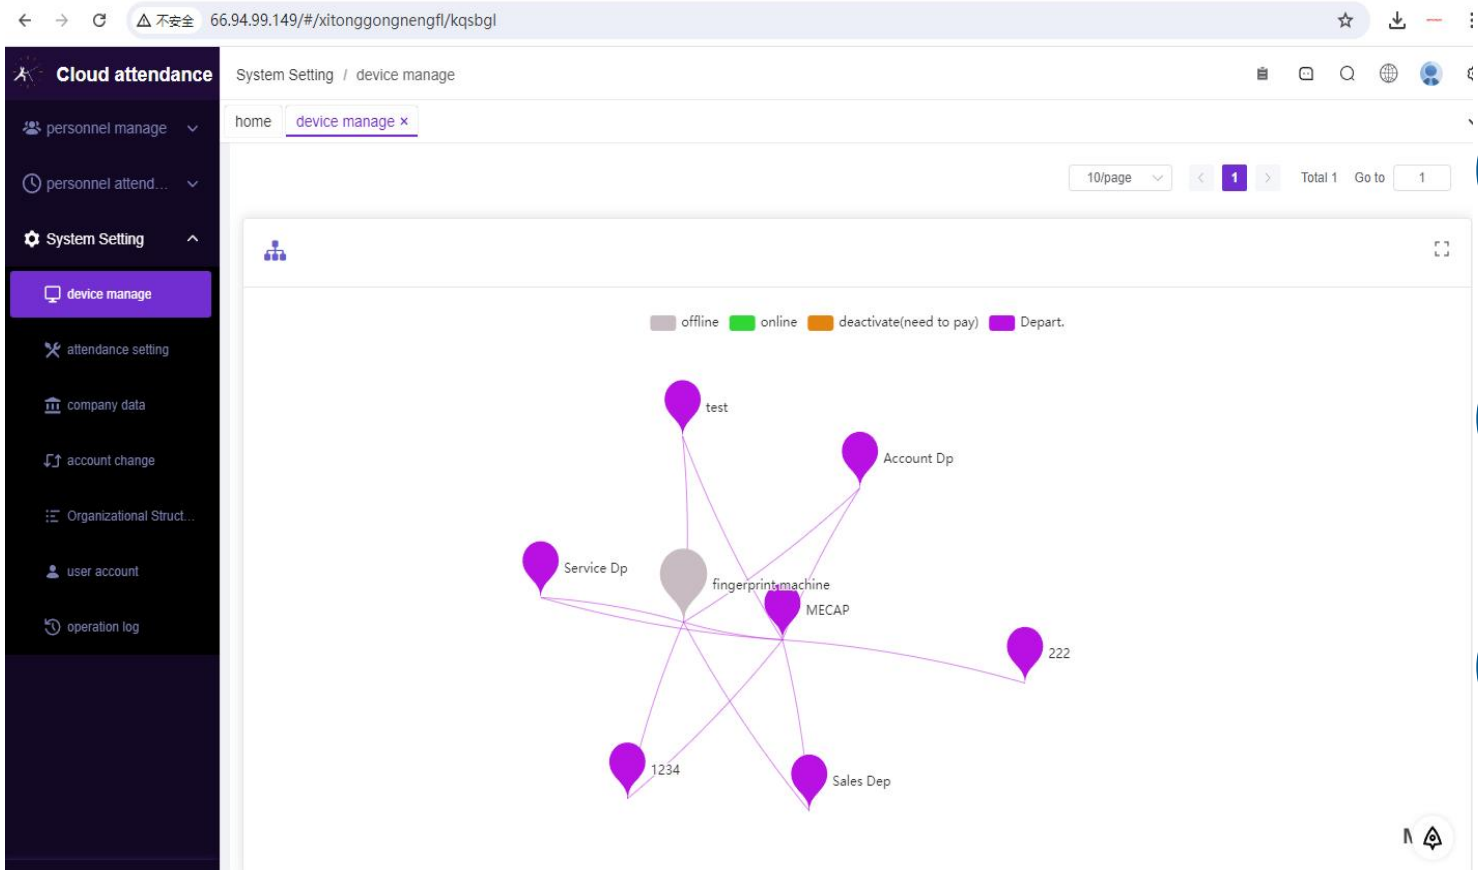
It Can be integrated with other 3rd party program by EPORDO MQTT API

Machine Status Monitor

It also shows status of machine ,EPORDO cloud-based time attendance software that not only tracks attendance but also monitors the status of machines (online/offline) and their valid days

Device Manage

Relationship diagram

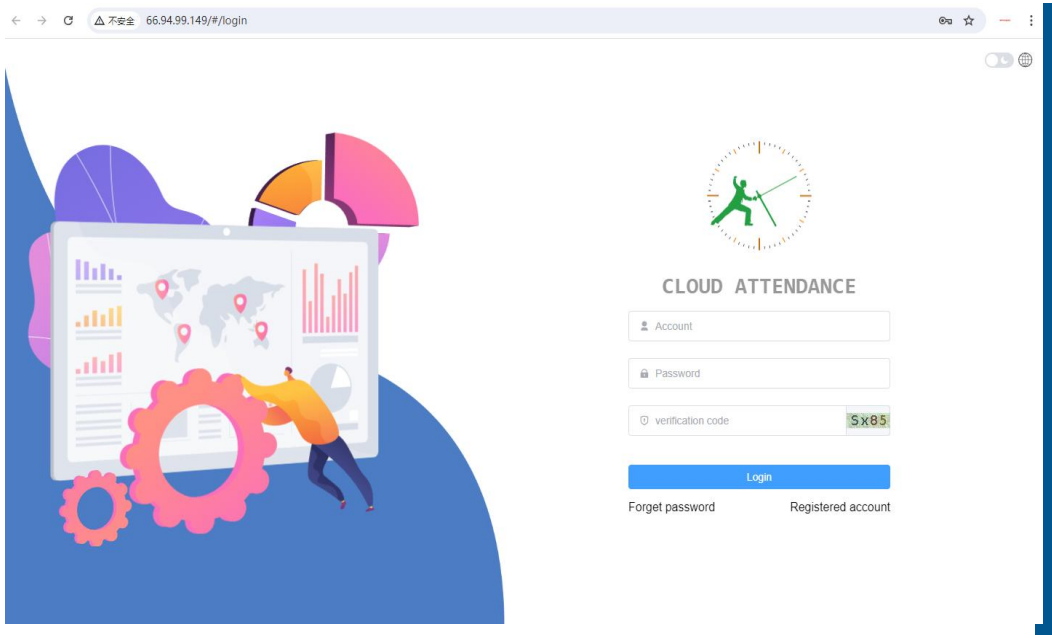


Here shows Relationship diagram between departments and machines

Displays belonging relationships, so you can easily see which department is using which device.Suitable for large organizations with complex departmental structures.provide a clear view of which department is using which device.

(Same department employees use same department machines - so when you get our EPORDO cloud machine, you have to set all information inside software, employee ID , name , department, mobile, machine department ,,,,)

EPORDO



PART 2 TWO

Level Management

EPORDO cloud-based online time attendance software that supports **level management**, allowing employees of different levels to view different data

Level Management

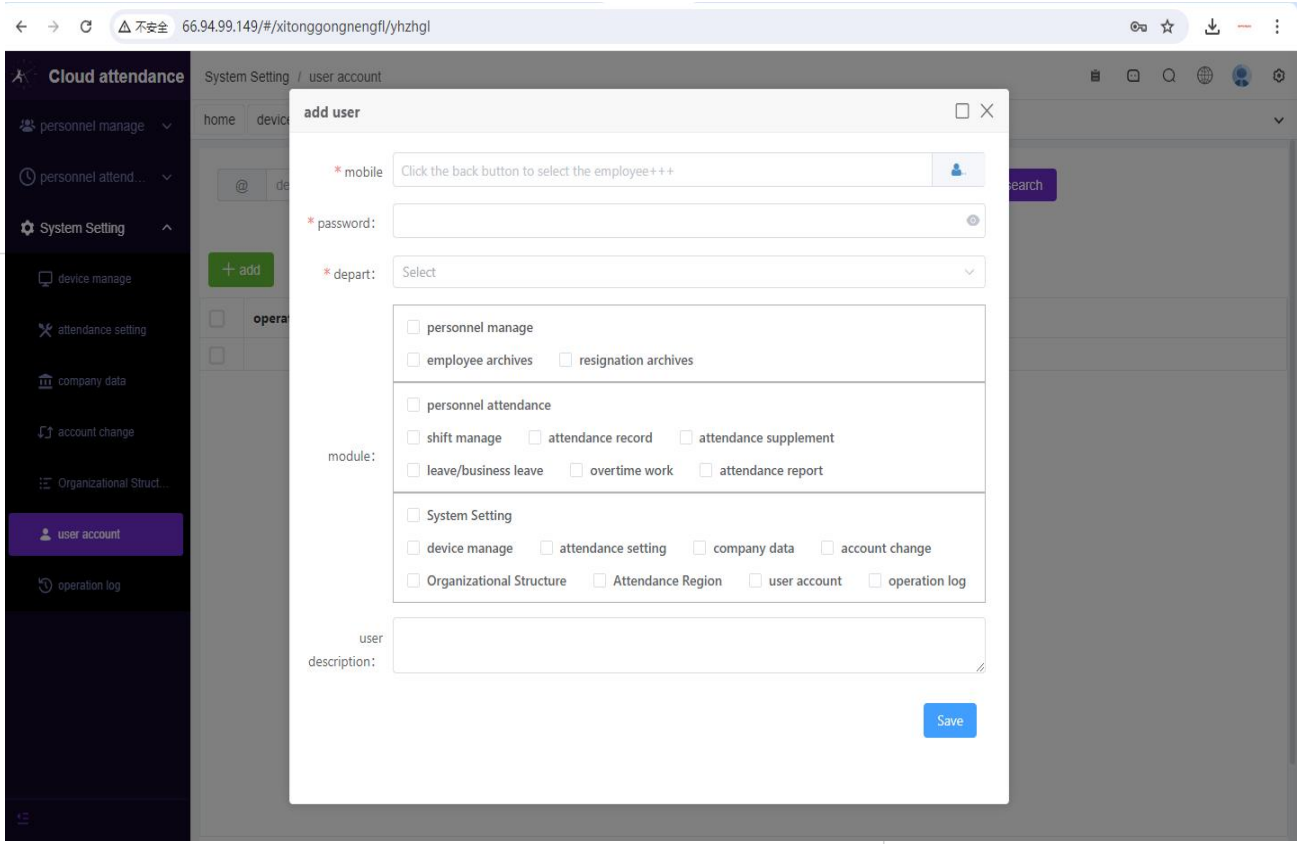
Role-based access control

01

Provides **multi-level management**, where different levels of users can access specific data based on their permissions

02

Employees can see their attendance records, while department managers can view their team’ s data

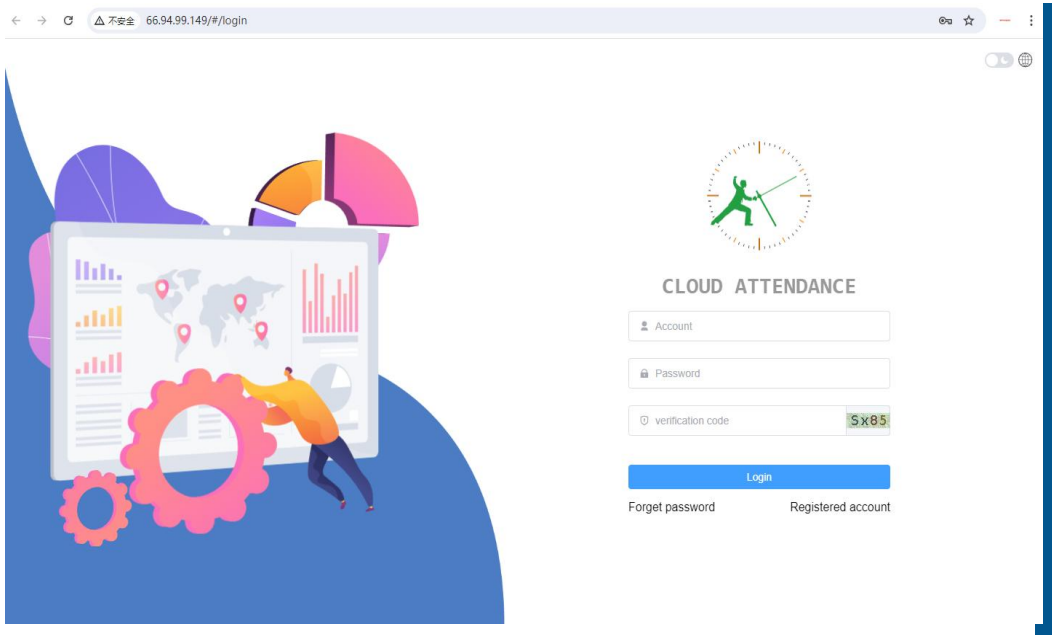


03

Each employee can login their own **employee link** to check their own attendance data anytime anywhere by their mobile no.

04

Supports role-based access control for administrative and managerial oversight of devices and attendance



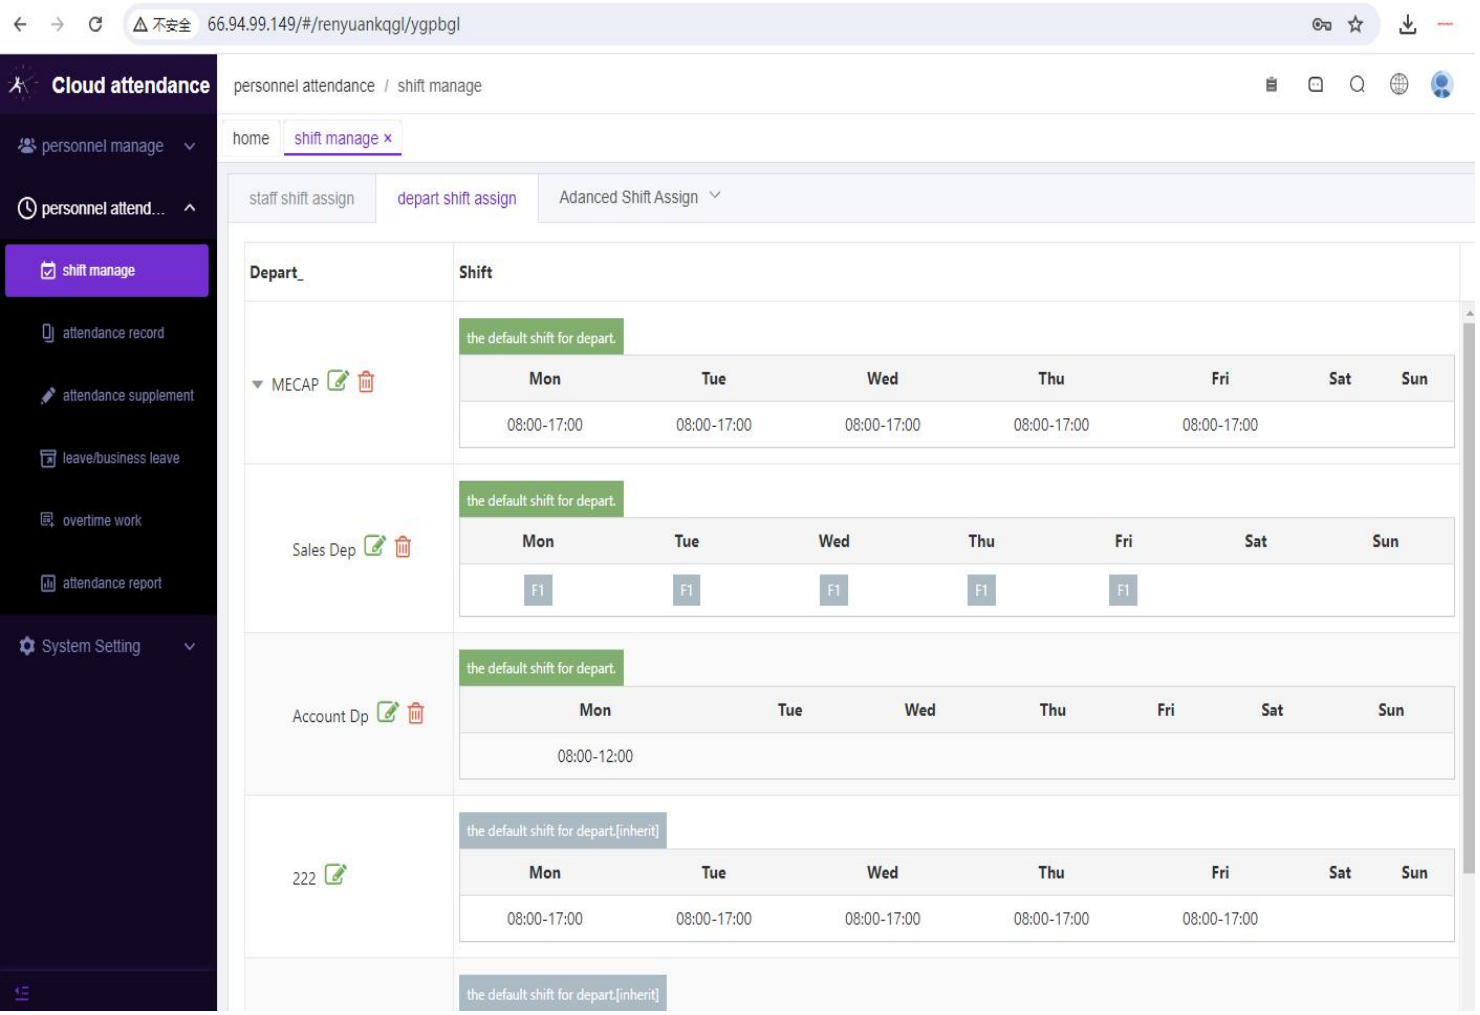
PART 3 THREE

Shift Management

EPORDO Cloud time attendance software offer the ability to handle flexible shift management, allowing managers to set up different types of shift schedules (such as rotating or split shifts)

Shift Setting

EPORDO Flexible Shift Management



Fixed shift

Normal working shift setting : for example: 8:00-17:00

F1 flexible shift

Free shift , no fixed working hours , only select date firstly + select F1 + click save : it will calculate your 1st verification on machine as punch in time & the last verification time as punch out time ; then calculate Your working time

F flexible shift

Free shift , no fixed working time, during one day , Max 4 times in&out calculation (1st time as in , 2nd time as out, 3rd time as in , 4th time as out ,,,,, total Max 4 pairs of entry and exit/ in&out)

Advanced shift

Allowing for complex or rotating shift patterns
